Professional Summary

Final-year B.Tech Computer Science Engineering student with expertise in Full-Stack Software Development, Artificial Intelligence, and Android Application Development. Experienced in designing and building production-ready software systems using Next.js, TypeScript, Firebase, Kotlin, REST APIs, and Large Language Models (LLMs). Passionate about scalable backend architecture, intelligent automation, cloud-connected applications, and solving real-world engineering challenges through clean, maintainable, and user-centric software solutions.

Education

VIT Bhopal University

Bachelor of Technology in Computer Science Engineering

2023 – 2027

CGPA: 8.35/10

Central Board of Secondary Education

Higher Secondary Education

2022

72%

Projects

AI Career Copilot – AI-Powered Career Intelligence Platform [GitHub](#) — [Live Demo](#)

- Developed an AI-powered career intelligence platform using **Next.js**, **TypeScript**, **Firebase**, **REST APIs**, and **Groq LLM** for resume analysis, ATS evaluation, and personalized career guidance.
- Engineered intelligent pipelines for AI-based skill extraction, ATS scoring, experience analysis, and personalized interview preparation using Large Language Models.
- Integrated real-time job recommendations and market analytics through external APIs, enabling personalized career insights and technology trend visualization.
- Designed scalable backend workflows with Firebase integration, robust API handling, and intelligent fallback mechanisms to ensure reliable system performance.

Smart Expense Tracker – Cloud-Connected Android Financial Management System [GitHub](#) — [APK](#)

- Built a real-time Android expense management application using **Kotlin**, **Firebase Authentication**, **Firestore**, and **MPAndroidChart** for secure financial tracking and analytics.
- Implemented cloud-based transaction synchronization, budget monitoring, category-wise expense management, and interactive visual dashboards.
- Designed scalable Firestore data models with real-time synchronization and PDF report generation for improved financial insights.
- Applied modular Android architecture and maintainable development practices to enhance scalability, performance, and long-term maintainability.

Technical Skills

Languages: Java, Python, JavaScript, TypeScript, Kotlin

Frontend: React.js, Next.js, Tailwind CSS

Backend: Node.js, Firebase, REST APIs

AI: Large Language Models (LLMs), Prompt Engineering, AI Integration

Database: Cloud Firestore, MySQL

Tools: Git, GitHub, Android Studio, VS Code, Postman

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Certifications

- Google IT Support Professional Certificate
- Applied Machine Learning with Python (Coursera)
